

Estimated leaf-out phenology for mid-elevation Bird Plot in 2022 based on thermal sums.

[As of 28 April 2022](#), predicted dates for budburst and 90% completion of leaf expansion are:

14 May and 25 May.

Predicted median dates of Arrival and 1st clutch initiation by Black-throated Blue Warblers are:

13 May and 1 June.

Real-time temperature records from USDA National Water & Climate Center (site 2069).

Phenological models adapted from Lany et al. 2016 using long term data of USDA Forest Service.

[As of 28 April 2022](#), the forecast date of leafout is 14 May for mid-elevation bird plots at Hubbard Brook.

Phenology measurements by Northern Research Station, USDA Forest Service.

Leaf phenology model adapted from Nina Lany et al. 2016, *Oikos*.

Analyses by Matt Ayres et al., Dartmouth College.

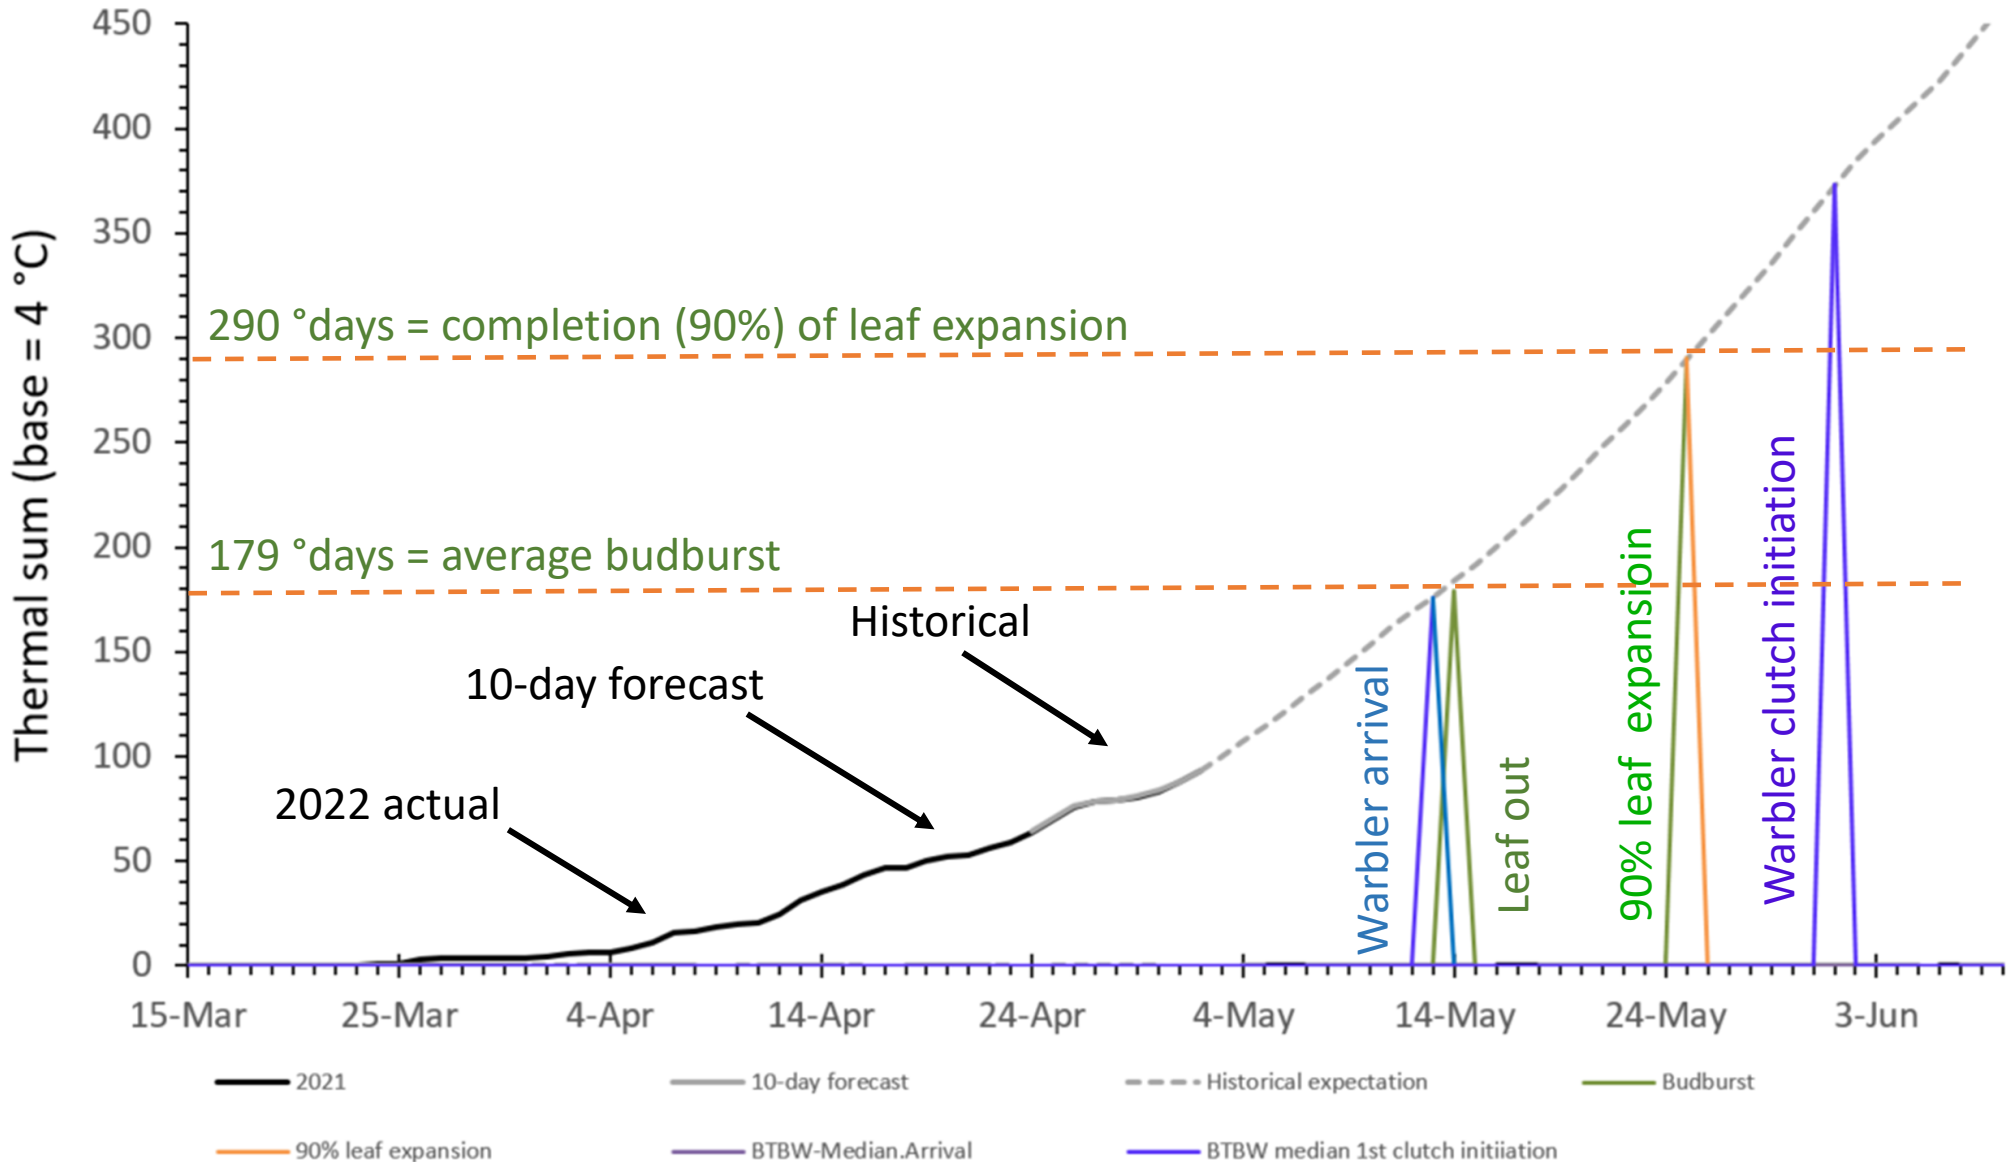

Estimated leaf-out phenology for mid-elevation Bird Plot in 2022 based on thermal sums.

[As of 24 April 2022](#), predicted dates for budburst and 90% completion of leaf expansion are:

14 May and 25 May.

Predicted median dates of Arrival and 1st clutch initiation by Black-throated Blue Warblers are:

13 May and 1 June.

Real-time temperature records from USDA National Water & Climate Center (site 2069).

Phenological models adapted from Lany et al. 2016 using long term data of USDA Forest Service.

[As of 24 April 2022](#), the forecast date of leafout is 14 May for mid-elevation bird plots at Hubbard Brook.

Phenology measurements by Northern Research Station, USDA Forest Service.

Leaf phenology model adapted from Nina Lany et al. 2016, *Oikos*.

Analyses by Matt Ayres et al., Dartmouth College.

Estimated leaf-out phenology for mid-elevation Bird Plot in 2022 based on thermal sums.

As of 17 April 2022, predicted dates for budburst and 90% completion of leaf expansion are:

12 May and 24 May.

Predicted median dates of Arrival and 1st clutch initiation by Black-throated Blue Warblers are:

13 May and 31 May.

Real-time temperature records from USDA National Water & Climate Center (site 2069).

Phenological models adapted from Lany et al. 2016 using long term data of USDA Forest Service.

As of [17 April 2022](#), the forecast date of leafout is 12 May for mid-elevation bird plots at Hubbard Brook.

Phenology measurements by Northern Research Station, USDA Forest Service.

Leaf phenology model adapted from Nina Lany et al. 2016, *Oikos*.

Analyses by Matt Ayres et al., Dartmouth College.

Estimated leaf-out phenology for mid-elevation Bird Plot in 2022 based on thermal sums.

As of 10 April 2022, predicted dates for budburst and 90% completion of leaf expansion are:

10 May and 23 May.

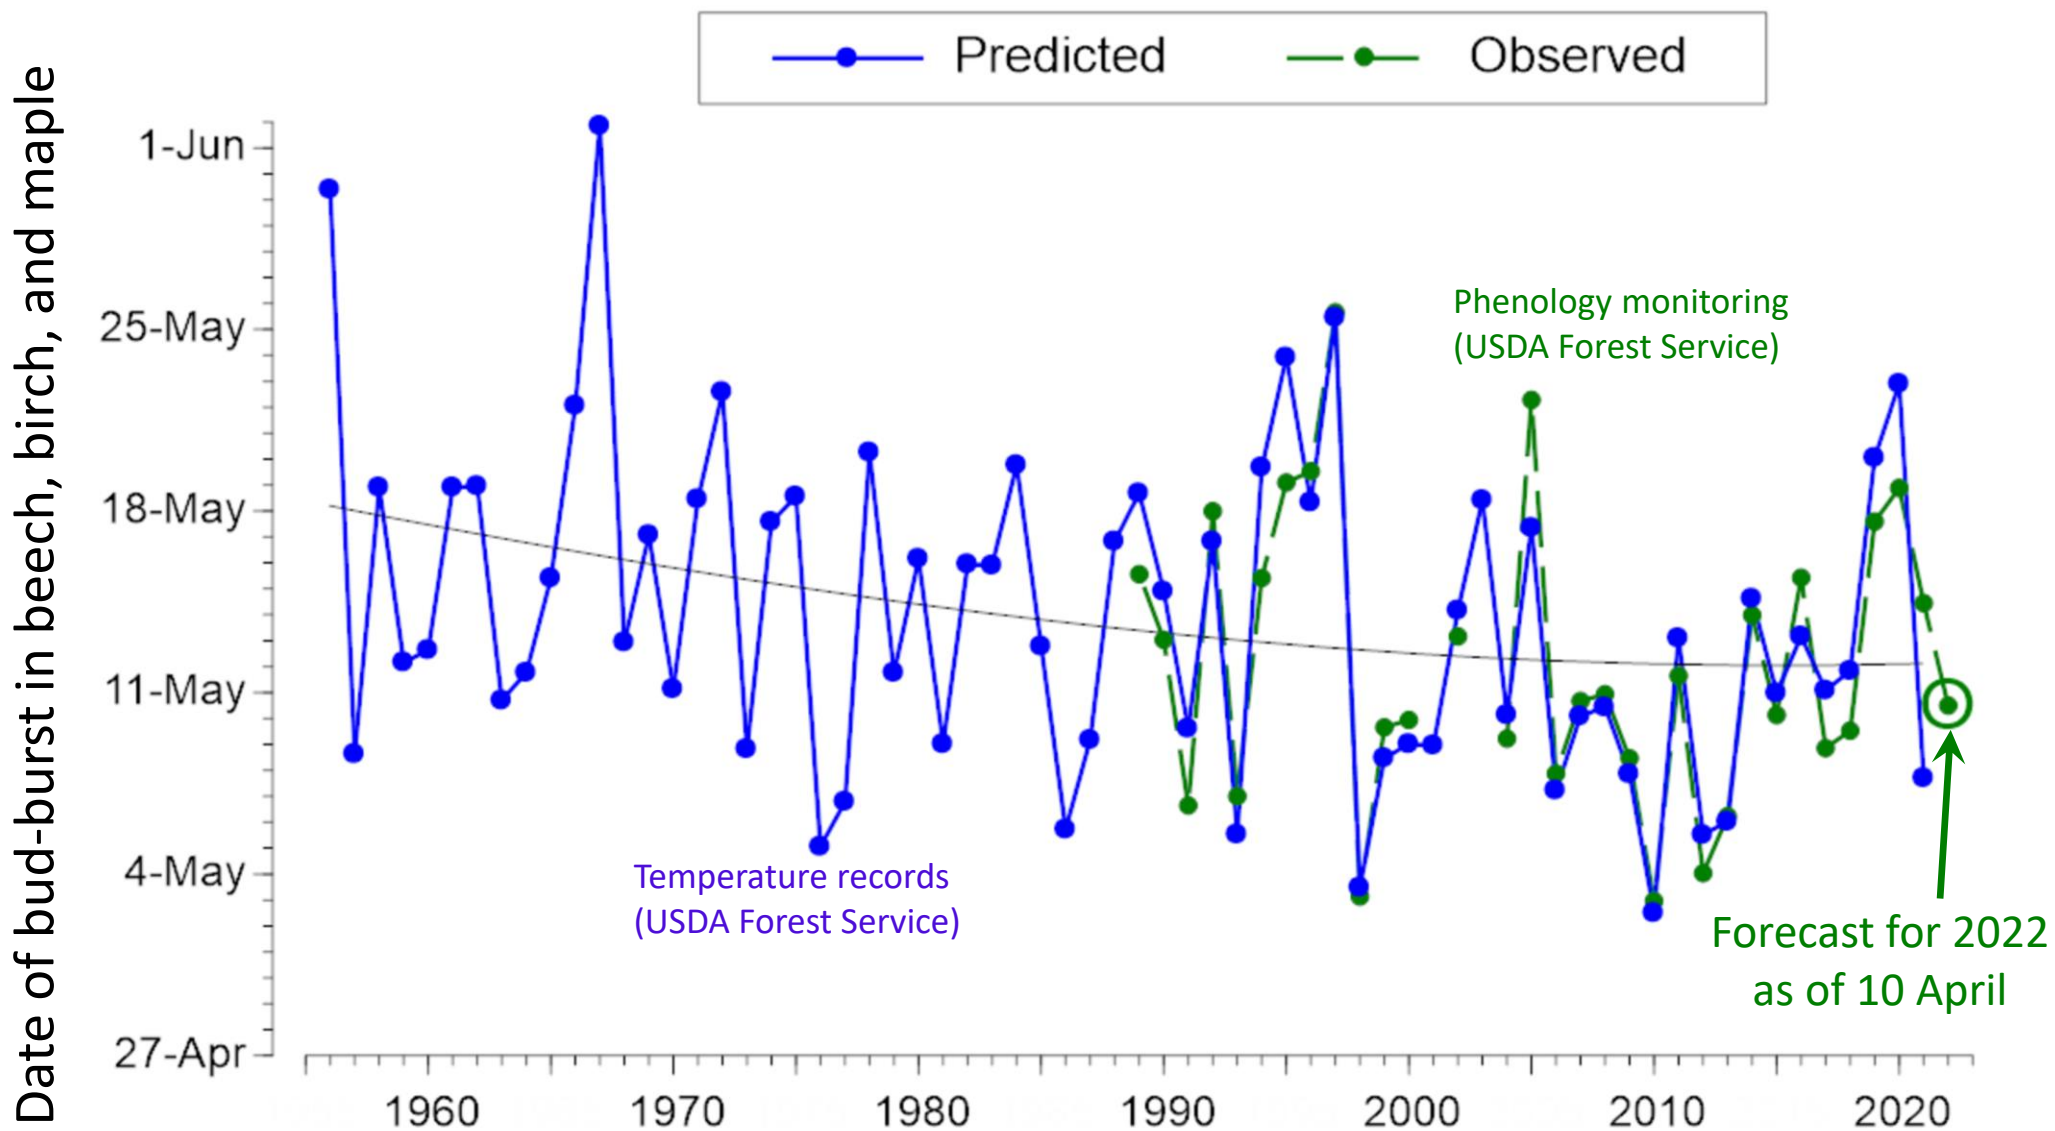

Predicted median dates of Arrival and 1st clutch initiation by Black-throated Blue Warblers are:

12 May and 31 May.

Real-time temperature records from USDA National Water & Climate Center (site 2069).

Phenological models adapted from Lany et al. 2016 using long term data of USDA Forest Service.

As of [10 April 2022](#), the forecast date of leafout is 10 May for mid-elevation bird plots at Hubbard Brook.

Phenology measurements by Northern Research Station, USDA Forest Service.

Leaf phenology model adapted from Nina Lany et al. 2016, *Oikos*.

Analyses by Matt Ayres et al., Dartmouth College.

Estimated leaf-out phenology for mid-elevation Bird Plot in 2022 based on thermal sums.

As of 3 April 2022, predicted dates for budburst and 90% completion of leaf expansion are:

11 May and 23 May.

Predicted median dates of Arrival and 1st clutch initiation by Black-throated Blue Warblers are:

13 May and 31 May.

Real-time temperature records from USDA National Water & Climate Center (site 2069).

Phenological models adapted from Lany et al. 2016 using long term data of USDA Forest Service.

As of [3 April 2022](#), the forecast date of leafout is 11 May for mid-elevation bird plots at Hubbard Brook.

Phenology measurements by Northern Research Station, USDA Forest Service.

Leaf phenology model adapted from Nina Lany et al. 2016, *Oikos*.

Analyses by Matt Ayres et al., Dartmouth College.
