"INCORPORATING OTHER WAYS OF KNOWING INTO ECOSYSTEM SCIENCE"

WITH DENISE BURCHSTED (SHE/HER)

This will be discussion on possibilities of learning about ecosystems through multiple ways of knowing, including modern ecosystem science. The discussion will be set within the context of: an abbreviated overview of past and present Indigenous presence in the region; language provided by Dr. Robin Wall Kimmerer in her book Braiding Sweetgrass; and an overview of a current study site at Hubbard Brook where multiple ways of knowing could be incorporated.

WE HOPE TO SEE YOU THERE!

CONTACT DAYNA DE LA CRUZ WITH ANY QUESTIONS.
