**"SO WHAT'S BELOW? A CRASH COURSE IN THE SOILS
AND ROCKS OF HUBBARD BROOK"**
WITH JOHN MORGAN (HE/HIM)

Come to the Pleasant View farmhouse for a deep dive into the geologic framework beneath our feet! This talk will briefly explore the rocks and soils of Hubbard Brook, and describe how the characteristics of the subsurface influence the water, plants, and animals of the valley.

WE HOPE TO SEE YOU THERE!

CONTACT DAYNA DE LA CRUZ WITH ANY QUESTIONS.
