# “WHITE MOUNTAIN FOREST HISTORY AND ITS LEGACIES FOR TODAY” WITH CHRISTY GOODALE (SHE/HER)

Christy Goodale will share stories of White Mountain forest history: harvests, fires, and pockets of remnant old growth, how the WMNF came to be, and some legacies of these past disturbances on ecosystem processes in today's forests. Along the way, she will also share her history from non-scientist to forest biogeochemist.

WE HOPE TO SEE YOU THERE!
